Re: Homansville Lime Quarry

Dear Glenn:

This is to confirm the results of our field examination of your company's proposed lime quarry test work to be done on Sec. 4, T. 10S., R. 2W., Utah County. The Declaration of Exemption (MR Form 4) will cover the work to be performed on this site.

As you know the work performed under the Declaration of Exemption must be limited to an area of disturbance of 2 acres for 12 consecutive months or move less than 500 tons of material in the same time period.

It is our understanding that when and if the tests prove the lime to be a useful commodity, mining will proceed in accordance with a Division-approved mining and reclamation plan.

As we discussed during our January 5, 1979 inspection, should tests prove that mining will proceed to full scale, the mining and reclamation plan for the Trixy, Bergin, and Mammoth Mines should be amended to include this quarry.

Also, you will remember that during the inspection we mentioned that the mining and reclamation plan for the whole Tintic operation needs some improvement. Since the Division has not finalized the review of this plan, we do not have specific suggestions at this time. Should you like to get together to talk about this plan and our suggested improvements, please contact us for a time and place for discussions.

Very truly yours,
